## PROFESSIONAL EXPERIENCE

<b>Website &amp; Database Developer</b> Asigra	<b>September 2017 – Present</b>
<ul style="list-style-type: none"><li>• Administered and customized Microsoft Dynamics CRM 2015 using built in settings as well as custom HTML and JavaScript Web Resources</li><li>• Administered and customized a PHP-based tech support portal: creating, maintaining, and fixing its various modules.</li><li>• Integrated a phpBB3 forum into the portal with SSO. Created modular extensions for the forum as per the phpBB guidelines and best practices</li><li>• Administered and customized JIRA SDLC software using Workflows, Schemes, Groovy ScriptRunner, Java plugins, and JIRA REST API</li></ul>	
<b>Full Stack Developer</b> TECHCOM	<b>August 2016 – May 2017</b>
<ul style="list-style-type: none"><li>• Learned best practices for successfully accomplishing HTML, JavaScript, Linux, PHP, and MySQL tasks efficiently and securely</li><li>• Actively participated in the SDLC process</li><li>• Contributed to major projects for high power clients in the finance industry</li><li>• Conceptualized, designed, and developed front-end and back-end solutions to client and internal requirements</li><li>• Familiarized myself with the technical and business aspects of numerous parts of complex account management systems</li></ul>	

## **PROFESSIONAL EXPERIENCE (Continued)**

### **Programmer/Analyst**

**June 2015 – September 2015**

Toronto Transit Commission

- Successfully implemented an easily maintainable dynamic employee hierarchy system with web development tools and deployed it onto the SharePoint intranet web pages
- Updated the look and performance of the RC&S department intranet pages with the focus on user experience
- Updated Access database forms and reports with new features to accommodate for new types of employee shifts
- Created user guide documentation describing the new features and use cases

## **PERSONAL PROJECTS**

### **Gamer Watch Lite Web App (Progress on Hold)**

**June 2017 – August 2017**

Environment: HTML5, SCSS, JavaScript, NodeJS, ReactJS, Meteor, MongoDB, Web API

- The single-page app project will function similarly to the Android App counterpart. I am using JavaScript-based modern web technologies for the responsive and beautiful UI as well as the functionality. The source code will appear on GitHub once the app prototype is complete.

### **Gamer Watch Mobile App**

**December 2014 – January 2015**

Environment: Android, SQLite, Java

- Successfully implemented concepts such as jsoup web-scraping, a local SQLite database, a background service, a preference activity, notifications, a custom list adapter, and a date conversion algorithm for sorting lists
- The Gamer Watch app can be found on the Google Play Store:  
<https://play.google.com/store/apps/details?id=com.cohaven.gamerwatch>

## **ACADEMIC PROJECTS**

### **Clinic Patient Management Web System**

Environment: Rational Rose, GitHub, HTML5, CSS3, PHP, MySQL

- Compiled a requirements document including use cases and use case diagrams
- Created test plans that will be used to test the implemented use cases
- Implemented the design and requirements programmatically
- Used GitHub to collaborate with team members and keep track of tasks

## **VOLUNTEER EXPERIENCE**

### **Pan Am Transit Ambassador**

**July 25, 2015**

Don Mills Station

- Helped commuters find their way around the station, the TTC routes, and the Pan Am events

## **EDUCATION**

### **Bachelor of Technology - Software Development Degree**

**September 2012 – April 2016**

Seneca College, Toronto
